

Heavy Steel Equipment Repairs

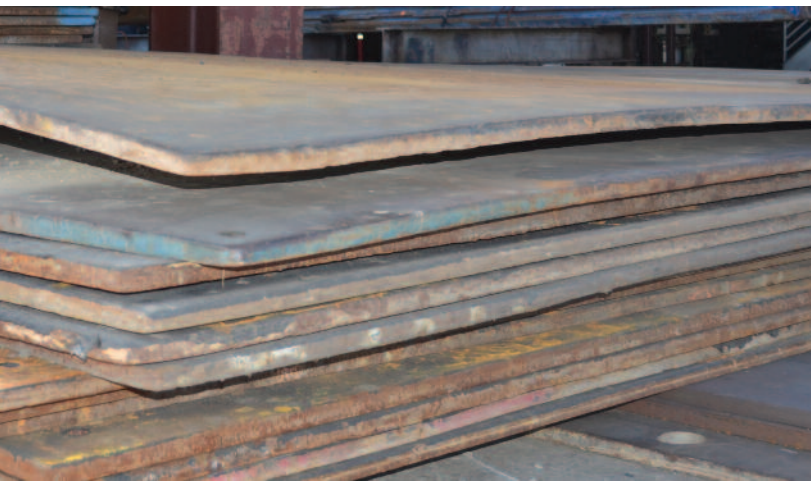

In the construction industry nothing cripples a jobsite like broken or damaged equipment and when it comes to fixing broken steel, Select Fabrications Company has the expertise to do repairs in the field as well as at our facility.

We specialize in repair services for heavy steel equipment such as:

- Shoring Equipment Repairs
- Steel Plate Straightening
- Any Welding, Cutting or Steel Fabrications
- Heavy Steel Equipment Repairs

Select Fabrications Company (SFC) is a full service steel fabricator with a California state C-51 Contractors License, and is certified by the AWS and City of Los Angeles. All phases of your project, from engineering, detailing, fabrication, and erection, including repairs, are managed at SFC. SFC prepares estimates from your plans and specifications and quality fabrication is ensured by in-house quality control, with third party contract inspections as required.
