TRACKCLEAN TO THE RESCUE!

TRACKCLEAN was developed by a major California Contractor to provide a low cost, portable, easy maintenance vehicle tire cleaner for the job site. TRACKCLEAN is designed to dislodge dirt, mud, rocks and asphalt from tire tread. When placed on haul roads just prior to entering paved streets, TRACKCLEAN reduces tracking and broken windshields.

TYPICAL USE ON MATERIAL IMPORT/EXPORT JOB SITE

TRACKCLEAN KEEPS CALIFORNIA AND NEVADA CLEAN AND MOTORISTS HAPPY

TRACKCLEAN is an innovative device designed to reduce tracking problems before trucks leave the job site. It helps to avoid the costly and time consuming chore of clean-up by preventing the problem before it happens. It will greatly reduce sweeping and water truck usage while showing the public the utmost consideration.

MULTIPLE TRACKCLEAN APPLICATION

TIRE TREAD & SIDEWALL FLEXING

THE SECRET IS TRACKCLEAN'S BARS

Strategically placed longitudinal bars produce a vibration and flex the tires as the truck drives over them, loosening material from tire tread, frames, tailgate aprons and bottom dump gates. Available in 8' long 10' wide sections, TRACKCLEAN can be designed to fit specific jobsite needs.

MATERIAL RELEASED FROM TREAD

TREAD MATERIAL CLOSE-UP

MEETING TODAY'S AQMD RULES

TRACKCLEAN complies with South Coast Air Quality Management District Rule #403 which strongly recommends implementation of preventive measures at construction sites. The AQMD recognizes TRACKCLEAN as one of the "best available control measures" for PM 10 in the south coast air basin.
