

OSHA-COMPLIANT TRENCH SAFETY TRAINING

Trench Shoring University (TSU) Now Offers Even More Access with Both Online and In-Person Training

LIVE, INSTRUCTOR-LED ONLINE

Trench Shoring University has your field personnel covered with safety training delivered through an online platform that provides all the benefits of live, classroom training.

When you enroll your employees at TrenchShoring.com/TSU they will receive the same Competent Person and Confined Space Entry training that we cover through our in-person seminars, including:

- More instructors
- More classes
- More and easier access for you to host instruction for your organization teams on-location

“Surprisingly, the online platform worked very well for this. I think we actually had more participation in this class than we typically would from an in-person course.”

Safety Director / CPT Recent Participant, July 2020

ON-LOCATION AT YOUR FACILITY

TSU offers individual training seminars at your location if you have a group of 15 or more, and adhere to necessary state and CDC requirements.

We're committed to protecting the health of attendees while also keeping them safe in the trenches, so consider an online group training class.

SAFETY TRAINING INSTRUCTION SAVES LIVES.

Live Online and On-Location Training Options

Your Live Online Training Options

- Enroll one or two people in a scheduled class
- Book a group class exclusively
- Classes offered on weekdays and Saturdays, subject to minimum enrollment
- Group trainings are booked individually and scheduled directly with the instructor

Competent Person Training: Duration: 7-8 Hours

- Training covers the CAL- OSHA Title 8, Section 1540 through 1541.1 and Fed OSHA 1926 Subpart P requirements covering excavations, trenching and sloping techniques, protective systems and soils classification with an introduction to confined space entry safety.
- Our comprehensive training is essential to keep your company compliant with current OSHA regulations.
- We test attendees to ensure retention.

Confined Space Entry Training: 4-5 Hours

- Provides managers, foremen, competent persons, and workers with basic information regarding entry into confined spaces.
- Includes new, upgraded California and Federal standards for Confined Spaces in Construction: Cal OSHA Title 8, Chapter 4, Article 37, 1950-1962, and Fed OSHA 29 cfr 1926 AA 1201-1213.
- Goals:(1) create awareness of hazards associated with confined space entry; (2) help workers understand procedures to be followed when entering confined spaces.

TSU Instructor

Greg Shreenan
NAXSA Approved Trainer

Registration/Scheduling:

Now you can book your course and pay directly online at TrenchShoring.com/TSU or contact Greg Shreenan at 760-250-7799 gregs@trenchshoring.com

Certificates Provided/Digital Proof of Attendance

Attendees for all training classes receive a certificate of attendance as proof of attendance. A printed roster of attendees along with digital proof in the form of a ZOOM printout of attendance will be given to your company for your training records.

Training at Your Facility

- 15 person minimum/day requirement
- You provide training room and lunch
- We provide all course materials
- Course length: 5-1/2 hours
- Written test at end of each seminar
- Reserve any class we offer for just your employees
- Group trainings are booked individually and scheduled directly with the instructor
- Please contact us if you have any questions about our safety and health procedures

Refresher and Awareness Training: 3 Hours

The Competent Person Refresher

- Prerequisite-previous CPT training with TSU
- Training updates participant on the current requirements of the Competent Person requirements

Excavation Hazard Awareness

- All employees must be trained on hazards in their working environment.
- This 3 hour class prepares new hires and those with new job responsibilities to understand the nature of hazards associated with underground work.
